

Automatically Filter Not Safe For Work (NSFW) Content from your Workplace

Using the embedded Computer Vision model for NSFW content, Cordiaa detects any Not Safe For Work content uploaded by the users.

- Cordiaa analyzes if an uploaded image contains concepts such as gore, drugs, explicit nudity, or suggestive nudity.
- It also marks an image as "SAFE," when it does not contain the aforementioned four moderation categories.
- This way, Cordiaa auto-protects your workforce from the risk of being exposed to Not Safe For Work content.
- It also protects individual users from the risk of them uploading any content that is Not Safe For Work.

Any inappropriate content that is flagged cannot be distributed within the organization thereby keeping your workplace safe and compliant at all times.

We can't wait to see your work go from Good to Great
